

Testing Scope

Homepage & Navigation:

1. Verification of product display and rendering.
2. Validation of product category filters (Phones, Laptops, Monitors).
3. Ensuring correct navigation to product detail pages.

Product Detail Page (PDP):

1. Verification of all product information (image, name, price, description).
2. Validation of the "Add to cart" functionality.

User Registration (Sign up):

1. Testing the happy path scenario with valid user credentials.
2. Negative testing with invalid/incomplete data and duplicate usernames.

User Authentication (Login):

1. Validation of login with correct credentials.
2. Negative testing with incorrect credentials.
3. Verification of the post-login state (e.g., "Welcome [username]" message).

Shopping Cart:

1. Verification of correct product addition to the cart.
2. Validation of the "Delete" item functionality.
3. Verification of the "Total Price" calculation.
4. Testing the "Place Order" workflow.

Header & Modals:

1. Functional testing of "Contact", "About us", "Log in", and "Sign up" modals.
2. Validation of the message submission functionality in the "Contact" modal.
